## Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - Claims 1-73, drawn to an apparatus for providing sensing feedback to a user interface, classified in class 345, subclass 700.
  - II. Claims 74-84, drawn to an apparatus for controlling power source of a display device, classified in class 345, subclass 211
  - III. Claims 85-103, drawn to a housing support structure for a display device, classified in class 345, subclass 905.
- 2. The inventions are distinct, each from the other because of the following reasons:

Inventions Groups I-III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Groups I-III has separate utility such as the invention of group I has separate utility such as the operator sensing feedback system does not control the power source for the display in Group II, does not utilize to support the housing for the display in Group III. See MPEP § 806.05(d).

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
